

LeMatic
AUTOMATION FOR BAKERY

Pattern Former

P7

LeMatic takes another step towards total automation of the packaging line with the LeMatic P7 Pattern Former and Loader. The P7 has been designed with industry-leading capacity, up to 70 packages per minute, increasing efficiency and flexibility while maximizing speed. LeMatic's all-in-one approach combines pattern forming with tray, carton and u-board loading, reducing overall maintenance while reducing labor.

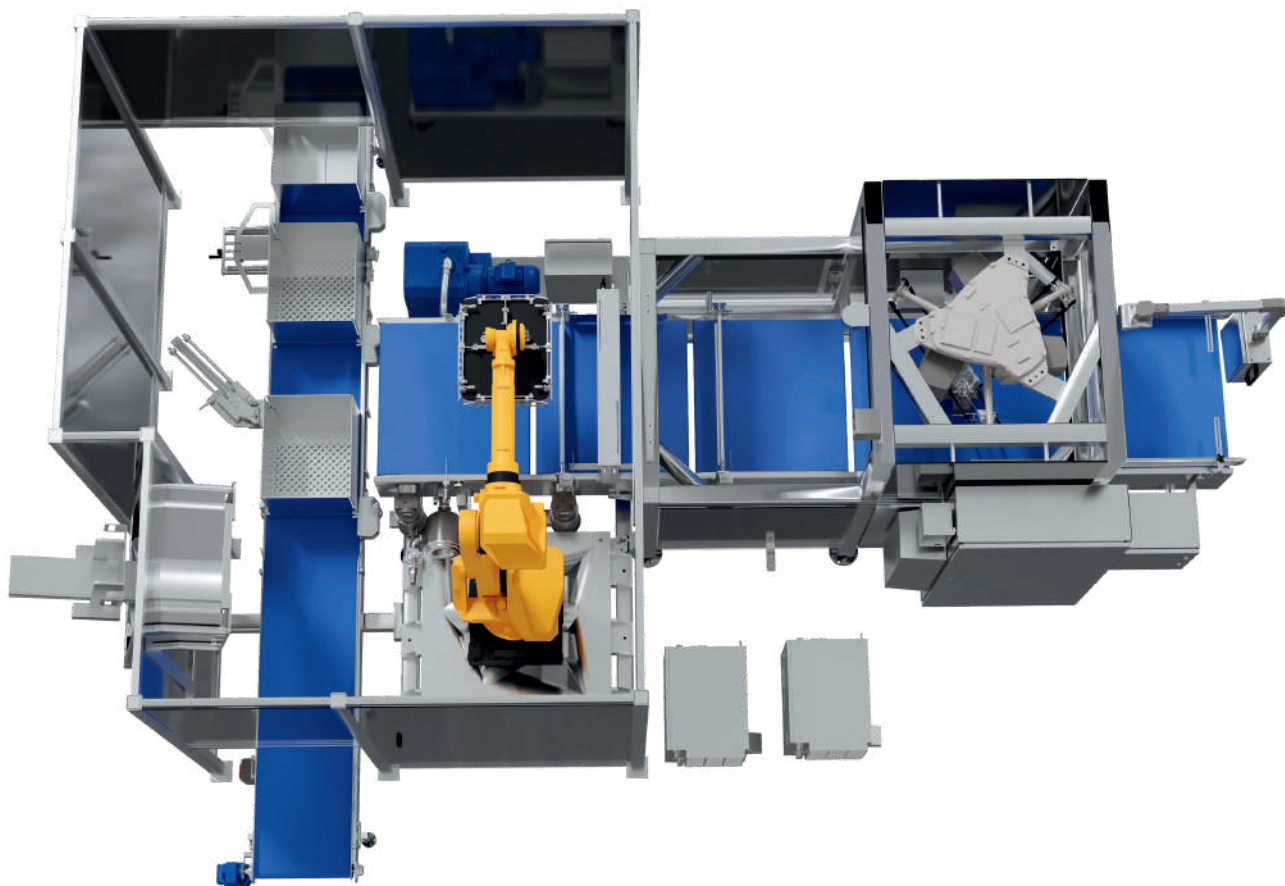

FEATURES

- **Heavy-Duty Stainless Steel Construction** - LeMatic continues its "Built for Bakery" industry standard, using a solid and sanitary design.
- **Integrated Fanuc Robotics** - Facilitate Pattern Formation and Basket/Tray/Case loading that can be combined with U-Board insertion between multiple loads.
- **Auto-iNet integrated** - State-of-the-art components along with LeMatic Auto-iNet, provide live feedback, operational reporting, remote support and operator & maintenance training.
- **Versatile Design** - New recipes/patterns can easily be designed at the HMI without factory assistance.
- **Quick-Change Tooling** - minimizes changeover time between products.

Pattern Former

P7

GENERAL SPECIFICATIONS:

- 240/480V-3Ph-60Hz standard, other available
- Approximately 10scfm @ 90 PSI @ 70 ppm (configuration dependent)
- Capable of Organizing and Loading a Variety of Packaged Goods, Including but not Limited too:
 - Bagged Buns, Rolls, English Muffins, Bread
 - Bulk Packaged Buns, Rolls, English Muffins
- Accommodates Various Loading Options

OPTIONS:

- Configurable for Bagged and Bulk Packaged Products
- Accepts up to 70 PPM Bagged Products
- Easily Programmable Recipes
- Retractable Nosebar Loading Mechanism
- Robotic Loading Mechanism (*Required for Case-Loading with U-Boards)
- Automatic Tool Changer
